

PRODUCT INFORMATION

METALLOTION PROTEC CE15L SPRAY

UNIVERSAL ANTI-SPATTER SPRAY, NON-FLAMMABLE, WATER-BASED, SILICONE-FREE

Properties

- METALLOTION PROTEC CE15L is a Bio Anti Spatter Lotion against welding spatter for use on work pieces, jigs and tools (torches)
- Protects wet and dry (long-term protection effect, lasts 2 weeks at least!)
- Integrated cleaning component (degreasing)
- Silicone-free, non-flammable and biodegradable

Advantages

- Tested and approved for welding, painting, cathoretic painting, powder-coating, zinc-coating, galvanization, etc.
- User safety, particularly in comparison to flammable sprays
- Easy overweldable, no porosity
- Protects all types of metal surfaces and solves any residual grease and oil - a subsequent fine cleaning is sufficient
- Works perfectly on black sheet, zinc-coated sheet or stainless steel
- Has been proven across several industries: automotive and vehicle technology, off-shore technology, container and steel construction, crane construction, etc.

Benefits

- Cost minimization and timesaving through the elimination of rework processes
- Increased quality with spatter-free metal finishes
- Supports the pre-treatment for all types of coating; pH neutral
- Cost-benefit factor >100 %
- 2-3 times higher reach through 2-cam aerosol system „Bag-In-Can“
- Maximum process stability + safety for users and the environment

Application

Spray onto work piece, jigs or tools prior to welding or cutting.

Onto workpiece or jig spray from a distance of app. 20 cm.

Onto torch and gas nozzle spray from short distance.

Shake before use! Protect from frost.

Features

Please see safety datasheet no. 01Ds5 (www.protec-austria.com)

Shelf life: Min. 12 Month

Bag in Can Aerosol 400 ml, ID no. 01C.5040
