

PRODUCT INFORMATION

PRESSURE-SPRAYER PRO 5

FOR LARGE SCALE APPLICATION SURFACES

PROPERTIES

- For application of the PROTEC anti-spatter fluids on large scale surfaces, like Laser-Lotion PROTEC LC20A or Metallotion PROTEC CE15L+ e.g. for sheets in laser cutting processes or large weld constructions
- Plastic pressure-container with manual pump
- With spray lance and flat-jet nozzle
- Sealings with high resistance of Viton (FKM)

ADVANTAGES

- Setup optimised for the application of PROTEC fluids
- Flat jet nozzle for efficient application
- Handy through light weight and compact dimensions

USE

- Fill with PROTEC fluid and pump up the pressure until the safety valve opens
- Spray by pressing the lever, move the flat jet nozzle transverse over the surface; adjust moving speed to meet the application quantity needed
- Please read the user manual for more detailed information!

SPECS

- Name:Pressure-Sprayer PRO 5
- ID-No.:Z004.002
- Max. filling volume:5 l
- Total volume:7 l
- Max. working pressure:3 bar, 43 psi
- Safety features:Safety valve/ venting valve
- Spray angle:80° flat jet
